which would become payable should he die immediately, leaving a widow or orphans entitled to such pension. The amount of the pension per annum so entered in the register against a contributor, or, in other words, his "registered pension" should be calculated (and re-calculated as often as may be necessary) in accordance with the following rules.

A.—Public Officer who commenced to contribute while a Bachelor.

Note.—No registered pension is to be recorded unless and until the bachelor contributor marries.

I.—First Wife's Prospective Pension.

Note.—The registered pension to be recorded on marriage is found by adding together the two amounts calculated in accordance with the following *Rules I. (a)* and *I. (b)* respectively.

(A) Pension in consideration of the contributions paid during bachelorhood.

Rule I. (a).—Accumulate the contributions at 6 per cent. compound interest, with yearly rests at each 31st December, and multiply the result by the quantity found from Table A corresponding to the respective ages next birthday of the husband and wife at the date of marriage. The product gives the registered pension on account of the contributions paid during bachelorhood.

(B) Pension in consideration of the annual contribution current at the date of marriage.

Note.—The amount of the current annual contribution is obtained by multiplying by 12 the amount of the last monthly contribution.

Rule I. (b).—Turn to the section of Table B which contains in the heading the age of the husband at the date of completion of his period of contribution, and multiply the amount of the current annual contribution, by the quantity found from that section corresponding to the respective ages next birthday of the husband and wife at the date of marriage. The product gives the registered pension on account of the annual contribution current at the date of marriage.

Quantity found from Table B, section for Officers aged 61 next birthday at completion of period of contribution :—

Husband* 30 }	} .. 4·29
Wife* 20 }	

Rs. 30 × 4·29 = Rs. 128·70 = registered pension in consideration of annual contribution current at marriage.

Total Registered Pension to be recorded on the bachelor contributor marrying :—

By <i>Rule I. (a)</i>	Rs. 37 81
By <i>Rule I. (b)</i>	Rs. 128 70
	Rs. 166 51

(c) Variations of pension consequent on increments to, and decrements from, the current annual contribution while the contributor is married to his first wife.

Note.—The cessation of the contribution from any cause before the completion of the full period of contribution must be regarded as a decrement from the current annual contribution equal to the amount of such current annual contribution.

* *Note.*—Where the ages are not given in the Tables, proceed as illustrated in the general examples given on pages 414 and 415.

Widows' and Orphans' Pension Fund.

Rule I. (c).—Turn to the section of Table B which contains in the heading the age of the husband at the date of completion of his period of contribution, and multiply the amount of the increment to, or the decrement from, the current annual contribution by the quantity found from that section corresponding to the respective ages next birthday of the husband and wife at the date of the variation of the contribution.

The product gives the amount to be added to the registered pension consequent on the increment to the current annual contribution, or, as the case may be, the amount to be deducted from the registered pension consequent on the decrement from the current annual contribution.

Example of the application of Rule I. (c):—

Assume particulars as in the *Example* subjoined to *Rules I. (a)* and *I. (b)*:—

Annual contribution increased on 31st May, 1893, from Rs. 30 to	Rs. 50
Annual contribution decreased on 30th April, 1898, from Rs. 50 to	Rs. 40
Annual contribution ceased on 31st March, 1903.	
1893, May 31st.—Increment to current annual contribution	Rs. 20

Quantity found from Table B, section for Officers aged 61 next birthday at completion of period of contribution:—

Husband 35 } .. 3.56
Wife 25 }

Rs. 20 × 3.56 = Rs. 71.20 = amount to be added to the registered pension.

<i>Deduct</i>	Rs. 29 10

Registered pension at 30th April, 1898

Rs. 208 61

1903, March 31st.—Cessation of contribution regarded as a decrement from current annual contribution

Widows' and Orphans' Pension Fund.

Quantity found from Table B, section for Officers aged 61 next birthday at completion of period of contribution :—

Registered pension at 30th April, 1898, as above	Rs. 208 61
Deduct	Rs. 92 0
			Rs. 116 61

II.—Second, and subsequent, Wife's Prospective Pension.

(A) Variations of pension consequent on increments to, and decrements from, the current annual contribution while the contributor is a widower.

Rule II. (a).—Assume that the contributor is married to a wife of the age that his last preceding wife would have been had she survived to the date of the variation of the contribution, and proceed in accordance with *Rule I. (c)*.

Example of the application of Rule II. (a) :—

If the particulars be as in the *Example* subjoined to *Rule I. (c)*, except that the first wife, who was born on 31st August, 1868, died on 30th November, 1888, it would be assumed that the contributor was at the date of each of the three variations of the contribution married to a wife who was born on the 31st August, 1868. The calculations will then be identical with those given in the *Example* subjoined to *Rule I. (c)*.

(B) Variations of pension consequent on the re-marriage of the contributor.

Note.—No variation of the registered pension is to be recorded if the second, or subsequent, wife was at the date of the re-marriage of the same age next birthday as the last preceding wife would have been had she survived to that date.

Rule II. (b).—If the second, or subsequent, wife was at the date of the re-marriage of a greater or less age next birthday than the last preceding wife would have been had she survived to that date, multiply the amount of the registered pension by the quantity found from Table C corresponding to the age next birthday of the husband at the date of re-marriage, and the age next birthday which the last preceding wife would have attained had she survived to that date; multiply the product so obtained by the quantity found from Table A corresponding to the respective ages of the husband and of the second, or subsequent, wife at the date of the re-marriage.

The result gives the registered pension to be recorded on the re-marriage of the contributor.

Widows' and Orphans' Pension Fund.

Example of the application of Rule II. (b) :—

Assume particulars as in the *Example* subjoined to *Rules I. (a) and I. (b) :—*

First wife died on	Nov. 30, 1888
Contributor re-married on	Jan. 31, 1893
Contributor's age next birthday at date of re-marriage	35
Second wife born on	June 30, 1873
Second wife's age next birthday at date of the re-marriage	20
Age next birthday which the first wife would have attained had she survived to date of the re-marriage	25

1893, January 31st.—The second wife being of a less age next birthday at the date of the re-marriage than the first wife would have been had she survived, the registered pension Rs. 166·51—see *Example* subjoined to *Rules I. (a) and I. (b)*—is to be re-calculated.

Quantity found from Table C :—

Husband 35 } ..	3·224
Wife 25 }	

Quantity found from Table A :—

Husband 35 } ..	·293
Wife 20 }	

Rs. 166·51 × 3·224 = Rs. 536·83

Rs. 536·83 × ·293 = Rs. 157·29 = registered pension at 31st January, 1893.

(c) Variations of pension consequent on increments to, and decrements from, the current annual contribution while the contributor is married to his second, or subsequent, wife.

Rule II. (c).—Proceed as in *Rule I. (c)*.

B.—Public Officer who commenced to contribute while Married.

III.—First Wife's Prospective Pension.

Note.—In every case of a public officer who commenced to contribute while married, the wife at the date of commencement of the contribution is to be considered as the Officer's first wife, and no particulars are to be recorded respecting any former wife to whom he may have been married, unless there is issue of such former wife of a pensionable age (see D.—Pensions to Orphan Children).

(A) Pension in consideration of the annual contribution current at the date of commencement of the contribution.

Rule III. (a).—Turn to the section of Table B which contains in the heading the age of the husband at the date of completion of his period of contribution, and multiply the amount of the current annual contribution by the quantity found from that section corresponding to the respective ages next birthday of the husband and wife at the date of commencement of the contribution.

Widows' and Orphans' Pension Fund.

The product gives the registered pension on account of the annual contribution current at the date of commencement of the contribution.

Example of the application of Rule III. (a) :—

Officer born on	Aug. 31, 1850
Officer married on	June 30, 1879
Officer commenced to contribute on	July 31, 1890
Annual contribution current on 31st July, 1890	Rs. 100
Date of completion of contribution period	Aug. 31, 1915
Wife born on	Oct. 31, 1860
Officer's age next birthday on 31st July, 1890	40
Officer's age next birthday at completion of contribution period	65
Wife's age next birthday on 31st July, 1890	30
1890, July 31st.—Current annual contribution	Rs. 100

Quantity found from Table B. section for Officers aged 65 next birthday at completion of period of contribution :—

Husband	40	}	.. 3.07
Wife	30		

Rs. 100 × 3.07 = Rs. 307 = registered pension in consideration of annual contribution current at commencement of contribution.

(B) Variations of pension consequent on increments to, and decrements from, the current annual contribution while the contributor is married to his first wife.

Rule III. (b).—Proceed as in Rule I. (c).

IV.—Second and subsequent, Wife's Prospective Pension.

(A) Variations of pension consequent on increments to, and decrements from, the current annual contribution while the contributor is a widower.

Rule IV. (a).—Proceed as in Rule II. (a).

(B) Variations of pension consequent on the re-marriage of the contributor.

Rule IV. (b).—Proceed as in Rule II. (b).

(C) Variations of pension consequent on increments to, and decrements from, the current annual contribution while the contributor is married to his second, or subsequent, wife.

Rule IV. (c).—Proceed as in Rule I. (c).

G.—Public Officer who commenced to contribute while a Widower.

V.—Second, and subsequent, Wife's Prospective Pension.

Rule V.—For the purpose of calculating the registered pension assume that the deceased wife survived to the date of commencement of the contribution and died immediately afterwards; then proceed in accordance with the rules applicable to the case of Officers who commenced to contribute while married see (B).

*Widows' and Orphans' Pension Fund.***D.—Pensions to Orphan Children.**

VI.—Orphans' Pensions at death of Widower Contributor.

(A) Case where the orphans are the issue of the same wife.

Rule VI. (a).—Divide the amount of the registered pension of the widower contributor equally among the children entitled for the time being.

Example of the application of Rule VI. (a) :—

Registered pension of widower contributor at his death, Rs. 150 per annum.

Children entitled on his death :—

Spinster daughter aged	19
Son aged	14
Son aged	12

Each of the three children will take a pension of Rs. 50 per annum.

If the spinster daughter marry at the age of 20 the two sons will each take a pension of Rs. 75 per annum.

If the younger son subsequently die at the age of 15 the older son will take the full pension of Rs. 150 per annum.

(B) Case where the orphans are the issue of different wives.

Note.—The rules here given provide for the case of two wives only.

Rule VI. (b).—(1) Divide equally among such of the children of the first wife as may be entitled for the time being *one moiety* of the pension which the first wife would have received had she survived the contributor.

(2) Divide equally among such of the children of the second wife as may be entitled for the time being *one moiety* of the pension which the second wife would have received had she survived the contributor, and had there been no issue of the first wife entitled to pension.

(3) So soon as all the children of either the first wife or the second wife have ceased to be entitled to pension, divide equally among such of the children of the other wife as may be entitled for the time being *the whole* of the pension which such other wife would have received had she survived the contributor, and had there been no issue of the first wife entitled to pension.

VII.—Orphans' Pensions at Death or Re-marriage of Widow.

Rule VII.—Divide the amount of the widow's pension equally among her children entitled for the time being.

Example of the application of Rule VII. :—

Amount of widow's pension at her death or re-marriage
Rs. 150 per annum.

Children entitled at her death :—

Assuming the particulars as in the example subjoined to *Rule VI. (a)*, proceed as therein indicated.

VIII.—Orphans' Pensions at Death of Married Contributor.

Rule VIII.—In the case where a contributor dies leaving a widow, and also children the issue of a previous marriage, divide equally among such of the children of the first wife as may be entitled for the time being *one moiety* of the pension which the first wife would have received had she survived the contributor.

Widows' and Orphans' Pension Fund.

On the widows' pension ceasing, divide equally among such of the children of the first wife as may be entitled for the time being *the whole* of the pension which the first wife would have received had she survived the contributor.

Note.—In this case, so long as the children of the first wife are entitled to pension, the widow's pension is *one moiety* of that which she would have received had there been no such children.

E.—Public Officer transferred to the Service of another Colony.

Throughout these rules and examples the calculations depend, not on the official income of the contributor, but on the amount of his contribution to the Fund, so that the transfer of a Public Officer to the service of another Colony does not affect his registered pension unless the amount of his current annual contribution is varied, in which case the proper adjustment is to be made in accordance with the preceding rules.

F.—Calculation of Quantities (or Tabular Results) for Ages not given in the Tables.

Table A.—The quantities are given for every age of the husband from 15 to 64, and for every fifth age of the wife from 15 to 65. Ages of husbands and wives below or beyond are to be treated as the youngest and oldest ages given respectively.

For the intermediate ages of wives, interpolate by first differences, as follows.

To find the quantity corresponding to the ages of a husband and wife aged respectively 35 and 27 next birthday :—

The quantity for ages 35 and 25 given in the Table is . . . 310

The quantity for ages 35 and 30 given in the Table is . . . 332

So that the addition of five years to the age of the wife results in an addition of .022 to the quantity given in the Table for ages 35 and 25.

An addition of two years to the age of the wife accordingly results by proportion in an addition of two-fifths of .022 to the quantity given in the Table for ages 35 and 25.

Two-fifths of .022 = .009, which added to .310 gives .319 which is the required quantity corresponding to ages 35 and 27.

Table B.—This Table is divided into eleven sections respectively applicable to Officers who will be aged next birthday 55, 56, 57, . . . up to 65; when they complete their period of contribution. Care should in all cases be taken to turn to the section which contains in the heading the age of the husband at the date of completion of his period of contribution.

In each section the quantities are given for 35 consecutive ages of the husband, terminating at the age preceding that at which the contribution ceases, and for every fifth age of the wife from 15 to 65.

Ages of the wife below or beyond are to be treated as the youngest and oldest ages given respectively. For the intermediate ages of wives interpolate by first differences as explained above. Thus, the quantity found from the first section of the Table (age 55) corresponding to the ages of a husband and wife aged respectively 45 and 38 next birthday is three-fifths of .17, added to 1.78, which gives 1.88.

For Officers who commence to contribute at an earlier age than 20 next birthday the method of calculation given in the subjoined examples is to be followed.

Widows' and Orphans' Pension Fund.

Example (1).—An Officer aged 17 next birthday, having a wife aged 15 next birthday, commences to contribute. Assume that the Officer is aged 20 next birthday, so that the quantity found from Table B will be 6·05.

This Officer receives an increment of salary at age 22 next birthday, when his wife's age is 20. Assume that his age is 25 next birthday, *i.e.*, his actual age 22 plus the difference between his actual age at entry and 20, which is three years. The quantity found from Table B will be 5·16.

Example (2).—An Officer aged 19 next birthday commences to contribute as a bachelor, and five years later, when aged 24 next birthday, marries, his wife's age being 20 next birthday. The quantity found from Table A in accordance with *Rule I. (a)* will be taken from the actual ages (husband 24 and wife 20), and will be ·422. With respect to the current annual contribution at marriage, assume that the Officer's age is 25 (his actual age plus one), so that the quantity found from Table B will be 5·16.

This Officer receives an increment of salary when aged 39, when his wife's age is 35. Assume as before that the ages are 40 and 35 respectively, so that the quantity found from Table B will be 2·72.

Note.—It will be observed that this method takes account of the actual number of years for which the annual contribution will run. In *Example (1)*, when the Officer receives the increment of salary at age 22 he has contributed to the Fund for five years, so that at the expiration of 30 years his contributions will cease. Similarly in *Example (2)*, when the Officer marries at age 24, he also has contributed to the Fund for five years, so that although he is two years older than the Officer in *Example (1)*, yet the unexpired period of contribution is the same in each case, and the wife's age is in each instance 20, so that no important error is involved in using the same tabular quantity for the two cases.

Table C.—The quantities are given for the same ages as in Table A; ages of husbands and wives below and beyond are to be treated as in using that Table.

For the intermediate ages of wives interpolate by first differences as explained above, except that it must be noted that in this Table an addition to the age of the wife results in a *deduction* from the quantity given in the Table.

To find the quantity corresponding to the ages of a husband and wife aged respectively 35 and 27 next birthday:—

The quantity for ages 35 and 25 given in the Table is .. 3·224

The quantity for ages 35 and 30 given in the Table is .. 3·010

So that the addition of five years to the age of the wife results in a deduction of ·214 from the quantity given in the Table for ages 35 and 25.

An addition of two years to the age of the wife accordingly results by proportion in a deduction of two-fifths of ·214 from the quantity given in the Table for ages 35 and 25.

Two-fifths of ·214 = ·086, which deducted from 3·224 leaves 3·138, which is the required quantity corresponding to ages 35 and 27.

Widows' and Orphans' Pension Fund.

Ord. 13 of 1906.

2 The prospective pensions of the widows and orphans of public officers contributing to the Fund on the Thirty-first March, 1904, and the existing pensions of the widows and orphans of any former public officers who died previous to that date shall be revised on the basis of the tables in the schedule attached to this Ordinance as though such tables had been in force since the date of the establishment of the Fund; and all existing pensions shall become payable at the revised rate as from the Eighth March, 1904, provided that in any case in which the pension already guaranteed under the tables previously in force would be in excess of the amount to be calculated under the tables attached to this Ordinance the higher amount shall be allowed and guaranteed.

Revision of pensions on basis of new tables.

3 After the pensions have been fixed according to the preceding section a valuation of the assets and liabilities of the Fund shall be made as on the Thirty-first March, 1904, precisely on the same conditions and assumptions as the valuation previously made under section 23 of the principal Ordinance, and seventy-five per cent. of the surplus disclosed by such valuation shall be applied in increasing the prospective pensions of the widows and orphans of the contributors to the Fund at the date of valuation and of former contributors who have ceased to contribute on attaining the age of sixty-five or on leaving the service, and the pensions of all existing pensioners in such shares and proportions as shall be recommended by the actuaries, having due regard to the principles laid down in this Ordinance and the principal Ordinance, account being taken in such division of the said seventy-five per cent. of the surplus of the fact that under the proviso to the preceding section certain pensions will have been fixed at a higher rate than is provided for by the tables attached to this Ordinance.

Valuation of funds and application of surplus.

4 All pensions accruing after the passing of this Ordinance in respect of increments of salary of existing public officers shall be calculated according to the tables attached to this Ordinance.

Calculation of pensions in respect of increments of salary of existing public officers. Resumption of payments by defaulting contributors.

5 (1) When the contribution of any person who has continued to contribute to the Fund under section 13 or 14 of the principal Ordinance after ceasing to hold office in the public service of Ceylon is not paid for six months it shall be lawful for the Directors, with the sanction of the Governor in Council, to allow such person to resume his contributions to the Fund at the same rate and subject to the same terms and conditions as if he had not made default in paying his contribution as aforesaid, subject nevertheless to the following conditions, namely:

- (a) The Directors shall not extend the benefit of this section to any person unless he satisfies the Directors that his default in paying his contribution was due to inadvertence or accident, and unless he has applied to be allowed to resume his contributions within such time as the Directors, having regard to the circumstances of the case, shall consider reasonable.
- (b) No person shall be allowed to resume his contributions to the Fund unless he has first paid all arrears of contribution up to date with six per cent. compound interest.
- (c) The Directors may, before allowing any person to resume his contributions to the Fund, require him to pay to the credit of the Fund, by way of penalty, such sum not exceeding fifty rupees as the Directors may think proper.

Ord. 13 of 1906.

Widows' and Orphans' Pension Fund.

(2) The provisions of this section shall extend to cases where the default in paying the contribution due to the Fund has been made before, as well as to cases where such default shall be made after, the passing of this Ordinance.

Provisions with regard to officers appointed after

6 Public officers appointed after the passing of this Ordinance shall not be allowed to become contributors to the Fund, anything in the principal Ordinance to the contrary notwithstanding; but abatements shall be made from the salaries or pensions of such public officers equivalent to the contributions and other payments which would have been levied from them under the provisions of the principal Ordinance, and shall be carried to the credit of the general revenue accounts of the Colony, provided that the sum so received shall not be assessable for military contribution under Ordinance No. 2 of 1898.

Computation of pensions of widows or children of such officers.

7 The pensions to which widows or children of deceased public officers appointed after the passing of this Ordinance are entitled shall be computed according to the tables attached to this Ordinance, and such tables shall in their case not be subject to any revision as provided in section 23 of the principal Ordinance, and such pensions shall be paid out of the general revenue of the Colony, and are hereby made charges upon such revenue.

Application of principal Ordinance to such officers.

8 The provisions of the principal Ordinance, so far as the same are not modified by the provisions of the two preceding sections, shall apply to all public officers appointed after the passing of this Ordinance.

Quinquennial valuation of Fund.

9 The actuarial valuations of the Fund contemplated in section 23 of the principal Ordinance shall be made five years after the valuation provided for in section 3 of this Ordinance, and quinquennially thereafter.

14th March, 1906.

TABLES.

Note as to the use of the Tables.*

Table A.—The tabular results are shown for every age of the husband from 15 to 64; and for every fifth age of the wife, commencing at age 15 and down to 65. Ages below or beyond should be taken at the limit shown. For the intermediate ages of the wives, interpolate by first differences, as follows:

	35 30	do.	= 332
		Difference	= 22

Widows' and Orphans' Pension Fund.

Ord. 13 of 1906.

Table B.—The tabular results are shown (in eleven divisions) for every age of the husband from 20 to 64, and for every fifth age of the wife, commencing at age 15 and down to 65. Ages below or beyond of wives should be taken at the limit shown. The results corresponding to the intermediate ages of the wives should be obtained by interpolation, in the manner illustrated above for Table A.

Examples of the Method of Calculation to be followed in the use of the Table B in the case of Officers who commence to contribute at an earlier age than 20 next Birthday.

Example (1).—An officer aged 17 next birthday, having a wife aged 15 next birthday, enters the Fund. Assume that the officer is aged 20 next birthday, so that the multiplier taken from Table B will be 6·05.

This officer receives an increment of salary at age 22 next birthday when his wife's age is 20. Assume that the officer's age is 25 next birthday, *i.e.*, his actual age 22 plus the difference between his actual age at entry and 20, which is three years. The multiplier taken from Table B will be 5·16.

Example (2).—An officer aged 19 next birthday enters the fund as a bachelor, and five years later, when aged 24 next birthday, marries, his wife's age being 20 next birthday. The multiplier for the accumulated contributions paid during bachelorhood will be taken from Table A for the actual ages (husband 24 and wife 20), and will be ·422. With respect to the contributions paid after marriage, assume that the officer's age is 25 (his actual age plus one), so that the multiplier taken from Table B will be 5·16.

This officer receives an increment of salary when aged 39, when his wife's age is 35. Assume as before that the ages are 40 and 35 respectively, so that the multiplier taken from Table B will be 2·72.

Note.—It will be observed that this method takes account of the actual number of years for which the annual contributions will run. In *Example (1)*, when the officer receives the increment of salary at age 22 he has contributed to the Fund for five years, so that at the expiration of 30 years his contributions will cease. Similarly in *Example (2)*, when the officer marries at age 24, he also has contributed to the Fund for five years, so that although he is two years older than the officer in *Example (1)*, yet the unexpired period of contribution is the same in each case, and the wife's age is in each instance 20, so that no important error is involved in using the same multiplier for the two cases.

In using this Table, care should be taken to enter the proper division corresponding with the age at which the 35 years of contribution will cease.

Table C.—The tabular results are shown for the same range of ages as in Table A. Ages below or beyond should be taken at the limit shown. The results for the intermediate ages of the wives should be obtained by interpolation, in the manner illustrated above for Table A; but it should be carefully noted that the correction in the case of this Table, is *subtractive*, and not additive, as in Table A.

*Widows' and Orphans' Pension Fund.***Illustrations of the Method of Assessing the Pensions.**

9. The following is the mode of assessing the pensions of widows whose husbands were members as above, and in the Public Service of Ceylon :

*First Wife's Pension.***A.—IN CONSIDERATION OF THE CONTRIBUTIONS PAID BY SUCH MEMBER DURING BACHELORHOOD.**

Rule.—Accumulate the contributions at 6 per cent. compound interest, and multiply the amount by the quantity found in Table A corresponding to the respective ages of the husband and wife at the time of marriage.

The product will give the annual pension to which the wife will be entitled on her husband's death on account of his past contributions.

Example.—Thus, if the total contributions of such member during bachelorhood, when accumulated at the rate of 6 per cent. interest, amount to Rs. 300, and the ages of himself and wife at the time of marriage are 30 and 20 respectively, then $\text{Rs. } 300 \times \cdot 346 = \text{Rs. } 103\cdot80 = \text{wife's pension.}$

B.—IN CONSIDERATION OF THE FUTURE ANNUAL CONTRIBUTIONS TO BE PAYABLE FROM THE DATE OF MARRIAGE.

(a) In respect of the official income receivable at the time of marriage.

Rule.—Multiply the annual contribution by the quantity found in Table B corresponding to the respective ages of the husband and wife at the time of marriage.

The product will give the annual pension to which the wife will be entitled on her husband's death on account of his contributions in respect of the official income receivable at the time of marriage.

Example.—Thus, if such last referred to member's official income at the time of marriage be Rs. 1,000 a year, and the annual contribution be Rs. 40 (to cease at age 55), and the ages of himself and wife at the time of marriage be 30 and 20 respectively, then—

$\text{Rs. } 40 \times 4\cdot05 = \text{Rs. } 162 = \text{wife's pension.}$

(b) In respect of increments made to the official income after marriage.

Rule.—Multiply the additional contribution by the quantity found in Table B corresponding to the respective ages of the husband and wife at the date of the increment of official income.

The product will give the additional annual pension to which the wife will be entitled on her husband's death in respect of his additional contributions on account of an increase of his official income.

Example.—Thus, if such last-referred to member's official income be increased by Rs. 200 a year, and the then ages of himself and wife are respectively 35 and 25, then the further pension will be :

$\text{Rs. } 8 \times 3\cdot26 = \text{Rs. } 26\cdot08 = \text{wife's further pension.}$

Widows' and Orphans' Pension Fund.

Ord. 13 of 1906.

C.—ASSESSMENT OF THE AMOUNT OF THE PENSION DURING THE TIME SUCH MEMBER IS A WIDOWER.

When such member becomes a widower, a pension is to be supposed to attach for the benefit of a wife of exactly the same age as the late wife would have been, such pension either remaining unchanged in amount from that to which the late wife was entitled, or becoming subsequently augmented or reduced in the manner provided for by the Rules, according as such member's contributions increase or decrease from that time through variations in his official income.

The amount so determined is to form the basis for estimating the commencing pension to which a second wife becomes entitled at the time of her marriage.

Example.—Thus, if such last-referred to member becomes a widower, a pension of (103·80 + 162 + 26·08) Rs. 291·88 is to be supposed to attach for the benefit of a wife of exactly the same age as the late wife would have been, and the pension will continue at that amount until such member's official income (and his consequent contribution) is either increased or decreased. If a further increment of Rs. 200 official income be made when such member is aged 40, and his late wife would have been aged 30, then the additional amount of supposed pension would be found by Rule 9 B. (b) thus :

Rs. $8 \times 2 \cdot 52 =$ Rs. 20·16 = wife's supposed further pension. Should such member re-marry, the amount to be used as a basis for estimating the commencing pension to which the second wife would be entitled would be either :

Rs. 291·88, if no augmentation had been made to the official income ;

Rs. 312·04, if an augmentation of Rs. 200 had been made to the official income at age 40, as above.

Note.—If there have been more than one wife, care must be taken to use always the age of the *last* wife.

*Second Wife's Pension.***10. A.—PENSION TO WHICH A SECOND WIFE (OF SUCH MEMBER AS ABOVE) BECOMES ENTITLED ON MARRIAGE.**

(a) When the second wife at the time of marriage is of the same age as, or older than, the first wife would have been, if then alive.

Rule.—The pension is to commence at the amount as determined by Article 9 hereof, and to remain stationary at that amount, unless and until such member's official income be increased or decreased.

(b) When the second wife at the time of marriage is younger than the late wife would have been, if then alive.

Rule.—Take the pension as determined by Article 9 hereof, and multiply it by the quantity found in Table C corresponding to the respective ages of the husband and that of his late wife at the time of the husband's second marriage ; multiply the last product by the quantity found in Table A corresponding to the respective ages of the husband and his second wife at the time of their marriage. The final product will give the commencing annual pension to which the second wife will be entitled on her husband's

death, in respect of his official income at the time of their marriage; and this pension is to remain stationary at that amount unless and until such member's official income be increased or decreased.

Example.—Thus, if at the date of re-marriage the age such member's first wife would have been is 35, his own age is 45, and that of the second wife is 30, then, if the pension to which the first wife if alive would have been entitled to, as found by Article 9 hereof, be Rs. 291·88, then—

Rs. 291·88 × 3·896 × ·238 = Rs. 270·64 = second wife's commencing pension.

B.—INCREMENTS ON THE LAST-FOUND PENSIONS.

The second wives' pensions are to be augmented as often as their husbands have an increase of official income. Such augmentations to be calculated according to the principles and in the manner described in Article 9 B. (b) hereof, always taking the ages of the husband and wife as they stand at the date of the increase of official income.

Third and subsequent Wives' Pensions.

11. The rules laid down in Articles 9 and 10 will apply, *mutatis mutandis*, to the case of pensions to a third or any subsequently taken wife of a member as above. It should be borne in mind that the pension to the last wife, and the age she would have been at the date of the further marriage, are always to be taken as the basis for estimating the commencing pension to which the new wife is entitled.

Abatement of Widows' Pensions.

12. When the official income of a member (as above) becomes reduced, either by abatement of the ordinary emoluments or by the grant of a permanent superannuation allowance, the widow's pension must be diminished by just the amount it would have been increased had the official income been raised instead of lowered.

For instance, if such member's official income become reduced by Rs. 250 per annum, the existing pension to which by the foregoing Rules the wife was entitled should be diminished by the amount of pension corresponding to a contribution of Rs. 10 per annum.

There would be no objection, in principle, to allowing such member to continue his old rate of contribution for the remainder of the 35 years, should he desire to do so, and so prevent a diminution of the pension; but, in that case, sufficient independent medical evidence should be produced that the state of his health is such that no financial damage to the Fund may be reasonably entertained. It is probable that a liberal construction of such a Rule would not operate adversely to the general interests, *provided that some means be adopted of checking this election in the case of the higher officials, where the pensions would generally be above the average.*

Pensions to Widows and Children of such Members as may have joined the Public Services of other Colonies.

13. The widow's pension should be based upon the estimated acquired interest that such transferred member takes in the then existing Fund at the date of his removal. This interest may

until the financial position of the Fund has been determined by a valuation (Article 8), be assessed as shown below. Upon the occasion of the valuation then next ensuing, and upon all future valuations, the interest as above estimated, and others emerging between the periods of valuation, should be determined or adjusted as the circumstances disclosed by such investigations may require, and according to the advice of the Actuary or Actuaries reporting.

14. The following Rules are applicable only up to the time of the first valuation (Article 8), and they should be re-settled on the occasion of each valuation by the Actuary or Actuaries then reporting.

If such Member be a Bachelor at the time of his Transfer.

First Wife.—His interest in the Fund should be taken as then, and according to Rule 9 A.; and this amount should be further accumulated at 6 per cent. compound interest from the time of such transfer until his first marriage: and the pension that the widow thence arising is entitled to should be computed by the same Rule—regard being had to the cessation of further contributions, and to the accretion only of 6 per cent. compound interest upon the estimated assessed interest at the time of transfer.

Example.—Thus, if the total contributions of such member during bachelorhood and up to the time of transfer amount at interest to Rs. 200, and if this sum, when further accumulated at 6 per cent. compound interest, amount to Rs. 300 by the time of his first marriage, and if the ages of himself and wife at marriage are 30 and 20 respectively, then $\text{Rs. } 300 \times \cdot 346 = \text{Rs. } 103\cdot80 =$ wife's pension.

Second Wife.—Take the pension as above determined, and multiply it by the quantity found in Table C corresponding to the respective ages of the husband and that of his late wife at the time of the husband's second marriage; multiply this last product by the quantity found in Table A corresponding to the respective ages of the husband and his second wife at the time of their marriage (*vide* Article 9 C.).

Example.—Thus, if at the date of re-marriage the age of such husband's first wife would have been 35, his own age is 45, and that of his second wife is 30, then, if the pension to which the first wife if alive would have been entitled to, as found above, be Rs. 103·80, then $\text{Rs. } 103\cdot80 \times 3\cdot896 \times \cdot 238 = \text{Rs. } 96\cdot24 =$ second wife's pension.

Third, &c., Wife.—For a third, or subsequently taken wife, take the pension for the last existing wife and proceed to adjust it in the manner shown for the case of the second wife.

If such Member be Married, or a Widower, at the time of his Transfer.

15. The widow's pension attaching to his then wife, or his supposed wife (if he be a widower), should be abated by just the amount that it would be increased corresponding to the amount of contributions that such member will cease to pay upon transfer from the Public Service of the Colony, and according to the principles laid down in Article 12. Again this abated pension should be adjusted upon re-marriage in the manner shown in Article 14, corresponding to the then ages of the husband and wife.
